

WSH Institute Visiting Expert Series: Occupational and Environmental Risk Factors for Cancer and the way forward

Synopsis:

WSH Institute's Visiting Expert Series brings you an opportunity to hear from experts familiar with research into occupational and environmental risk factors from the International Agency for Research on Cancer (IARC) and the Imperial College London.

Dr Straif will share on IARC's work in evaluating occupational and environmental risk factors for cancer and what we can do to prevent exposure to these factors.

Dr Rushton led the study to estimate the burden of disease from occupational cancers in Britain. The key results from this study and some of the strategies and initiatives that have been developed will be presented during this session.
